
NEW ENGLAND MONEY HANDLING SYSTEMS, INC.

2024 Product Guide

About the Company

From its inception in 1976 New England Money Handling Systems has been a company focused on providing the highest possible level of service. With over 200 years of combined service experience among our staff we are uniquely positioned to handle all of your branch automation needs. Our list of customers continues to grow as our superior products and services attract and retain clients.

All of our product lines (including new, reconditioned, or leased equipment) can be placed under a service contract which provides both long term savings and peace of mind. As an authorized dealer of many leading manufacturers, we provide the highest quality products available in the industry. Our sales force focuses on providing solutions to our customers which will improve the efficiency and competitiveness of their financial institutions.

Count on us for the best equipment available, hands-on service, and insight on solutions well-suited to your institution.

***New England Money equals
Experience, quality, and responsiveness!***

About this Guide

The purpose of this product guide is to provide our customers with a more detailed overview of the products and services provided by New England Money Handling Systems. We have included our most popular products and services. If you do not see the product or equipment that you need listed, please give us a call at (508) 435-4022.

How We Help

Every need is different and New England Money Handling Systems has partnered with a variety of manufacturers to meet all of our customers' needs. Please give us a call to discuss your specific applications, and we will help you to find the right product. Before you buy, we are able to provide you with demonstrations and trials of most products. We look forward to preparing you and your team prior to installation to exceed your expectations and ensure perfect fit. We strongly believe in a comfortable and well-informed buying experience for the customer.

Service & Maintenance

New England Money is an In-House Service Company. Our team controls your project from start to finish ensuring the best quality and delivering excellent customer service. We offer Standard and Premium Support for your Cash Recyclers & ATM/ITM's including first line, second line maintenance and monitoring service.

GLR-100™

Glory's GLR-100™ Intelligent Cash Recycler

Smart and intelligent features to improve business process with fast transactions 12 notes/sec. and 720 notes/min.

Secure features that ensure system integrity and reduce risk. The GLR-100 manages banknotes in its storage cassettes using banknote serial numbers, preventing discrepancies in the event of a jam.

Versatile options and advanced functionality to enhance branch performance that will fit your needs anywhere.

Banknotes are securely stored in the safe

With high-capacity storage within a safe, bank branches can store all/most of their cash, thus eliminating the need for a separate vault in some cases.

We are so confident you will love the efficiency and ease of use; we will let you try it for FREE!

DynaCore Cash to Core Automation

The latest innovation, DynaCore is designed to lead cash automation integration into the next generation. DynaCore is a completely seamless solution, able to integrate with Cash Dispensers, Cash Recyclers, Cash Discriminators, Coin Dispensers, Coin Sorters, and Coin Scales. As a result of this universal compatibility, DynaCore is uniquely qualified to scale and grow with your business.

GLR-100™

Glory's GLR-100™ Intelligent Cash Recycler

Cutting edge and trusted recognition technology is incorporated into the GLR-100: based on a long history and worldwide experience.

Trusted by **80+** countries. Note storage dependent on bill quality.

Standard Capacity 11,700 notes
Flexible configuration options

Deposit

Dispense

Coin Dispense Options

With the expectation of fast, reliable service higher than ever, coin dispensers get more customers through the teller lines in less time. By shaving valuable seconds off of every transaction, coin dispensers can cut minutes off the wait and deliver improved customer service. Pairing a coin dispenser with your recycler will boost teller efficiency and leave your customers smiling.

NCR Interactive Teller

NCR pioneered ITM technology nearly a decade ago, and as their premier partner in the area, New England Money has been instrumental in evolving the solution from the early adopter phase, to a well-developed, high-value channel.

Through years of deploying ITMs across our footprint, New England Money has gained valuable insights from our partner banks and credit unions as to the best applications of this technology.

There are two main types of successful ITM deployments:

In-Lobby

In-lobby ITM placement requires full commitment. The ITMs will be the primary transaction channel with no obvious teller line alternative. This drives 100% of the traffic to the ITMs and allows branch staff to serve a supporting role while offering additional products and services.

Drive-Up Islands

Another common implementation is to install drive-up islands as standalone “branches.” With Interactive Teller you can test the waters on the periphery of your footprint. Place an Island AIT in an area to provide full service immediately at a significantly reduced cost compared to a traditional or even small footprint branch.

Drive-Up

It has been proven time and again that drive-up transactions are faster with the Interactive Teller platform than at traditional settings (2-4 mins vs 6-9 mins). When an island AIT (Automated Interactive Teller) replaces a traditional pneumatic drive-up, you can have fewer tellers providing better service across multiple branches.

An ITM is an innovative new banking technology that allows you to conduct teller transactions via video conferencing at the drive-thru without entering a branch.

NCR Interactive Teller

NCR
ATLEOS

Partner
Network

New England Money has vetted multiple manufacturers in the ITM space and has identified the reasons why NCR has been and continues to be the most successful. ITMs can be thought of as having three transactions delivery channels: teller driven, self-service, and teller assisted:

Teller driven has provided the greatest customer satisfaction and is NCR's primary focus with ITM technology. The customer simply taps the touchscreen and they are connected with a highly-trained, professional teller who performs the processing of the transaction and guides the customer to simply insert identification and transaction media (cash/checks). This results in speedy and accurate transactions (average 2-4 minutes/transaction).

Self-service simply refers to any transactions a customer can perform without the aid of a bank or CU employee. The ATM channel refers to self-transactions that we are all familiar with, cash withdrawal, bulk cash/check deposit, transfers, balance inquiry. What is fascinating is how under-utilized the traditional ATM channel can be. Once ITMs are put in place, ATM channel usage will often double,

Teller Assisted refers to a scenario where a customer begins a transaction via self-service, and requests assistance from a teller to complete it. This is often the result of a self-service channel that has been bloated with complex transactions that customers struggle to complete on their own. This type of model can result in slow transactions and though it is available, NCR has chosen not to focus on this type of transaction for this very reason..

Walk- Up ITM**

SelfServ 6688 Drive-Up Island

SelfServ 6684 Walk- Up

Increase productivity

Live tellers in a central location are deployed instantly across multiple sites, matching customer demand for when and where live teller service is needed. This allows you to maximize workforce productivity whilst consistently managing the performance of your staff from a central location.

NCR SelfServ 80 Series ATMs

The most configurable and upgradable range of ATMs in the industry

Available to Serve More Customers

The NCR SelfServ Family ensures you stay connected with higher uptime to help drive more transactions through the ATM channel and serve more customers. There are a range of core modules inside these ATMs that drive enhancements in the areas of dispense, depositing of mixed media, and recycling. The NCR 80 Series also offers the widest range of configurations including dual dispense, recycling, and mixed media deposit and dispense. Many of these modules offer an increase in cassette capacity as well as deposit and dispense size to ensure your network can serve your customers where and when they demand.

Put Your Customers at the Center of Everything you Do - Now and in the Future

The NCR SelfServ ATM family has been created to not only accommodate the technologies of today, but also to easily adapt to what's to come in the future. This range of ATMs is designed to seamlessly deliver a full range of interactive and assisted service transactions at any location, any time – improving accessibility and usability for consumers, service engineers, and branch staff.

- **X9 for export to Federal Reserve Bank, Item Processor/Correspondent Bank**
- **Automated Purging of data and images based on date**
- **Deposits process based on cut off time**
- **Full featured repair module**
- **CAR/LAR, MICR Validation, Image Quality Testing (All Optional)**
- **Posting File Creation (Optional)**

Encompass: Remote Management

NEM is rising up to meet the needs of today's changing ATM and ITM environment. Using our 45 years of service experience, we have created a solution that will combine your hardware maintenance and software subscription with today's latest remote technologies to offer superior support and uptime as well as compliance with current regulations.

OUR FEATURES INCLUDE:

Software Distribution -

- Upgrade, patch, bug fix, and more
- Provides reporting of latest patches for compliance purposes

Command and Control – Execute scripts, commands remotely on any ATM

Remote Management –

- Augments on-site field technician visits with remote maintenance and upgrades
- Retrieves diagnostics logs, initiates power-fail restarts, and isolates and resolves routine problems or soft failures without any expensive FLM site visits
- RMM Agent allows remote access for troubleshooting terminal resources.

Inventory - Collect hardware, software (e.g. OS, applications) and peripheral information that impacts fleet management costs

Dashboard View - Access to Fleet performance statistics

FUTURE FEATURES:

- Electronic Journal storage and retrieval.
- Realtime monitoring and incident management.
- Marketing campaigns .
- Whitelisting software deployment.
- Real time backup.

Self-Service Coin Machines

Bring potential customers and members into your branch

Glory QuickChange

Self-service coin deposit solution

The QuickChange is a fully-automated, self-service coin deposit solution which enables financial institutions to draw more customers to the branch. QuickChange can eliminate up to 400 hours per year of non-customer facing labor, enhance customer engagement, and increase core deposits. As a destination service, QuickChange also offers the potential for fee income.

The Universal Placement Kit allows easy access to coin for through the wall placement

SCAN COIN
a SUZOHAPP company

CDS 9 Self-Service Around the Clock

The CDS-9 enables complete automation of coin deposit and note recycling, allowing fast returns through increased efficiency, staff savings, and improved cash flow. The CDS-9 evolved out of the banking and public transport sector and manages coins, notes, and tokens conveniently and securely, providing the highest uptime on the market while securing coin and cash.

Back Counter Coin Processing

Glory SCW-20

Building upon decades of coin processing expertise, the SCW-20 series is Glory's third generation coin sorter designed to meet the needs of customers across a broad range of applications. Aimed at medium bank branches or cash centers, retailers, transportation hubs, or anywhere coin is accumulated, SCW-20 provides a fast and efficient method to count, sort and authenticate. By automating coin processing businesses can free employees to focus more on revenue generating and customer facing activities and reduce errors while simultaneously increasing efficiencies.

Tabletop Coin Counters

Glory Mach 3

The Mach 3 Coin Sorter features a unique Figure 8 coin sorting mechanism that provides superior throughput with processing speeds up to 1500 coins per minute. Its innovative design offers highly jam-free operation and simple recovery procedures. The Mach 3 is offered in a variety of configurations for tabletop operation including coin capture in drawers, half Fed bags, or paper coin rolls

Semacon S-530

The Semacon S-530 heavy duty mixed coin sorter and value counter offers intelligent cash management for all five U.S. coin denominations in a durable, compact design

Semacon S-140

The Semacon S-140 heavy duty coin counter/sorter offer high speed accuracy in a durable, compact design

Glory WS-30 High Speed Wrapper

Roll your own coin the easy way!

The Glory WS-30 tabletop high speed wrappers will wrap 12 rolls per minute. A perfect compliment to a lobby or backoffice coin sorter, providing an easy way to recycle your coin and reduce or eliminate the cost of purchasing rolled coin.

Currency Discriminators

Cassida PRO Series Zeus

Zeus defines a new dawn in 2-pocket currency discriminators. With its unparalleled bill recognition, advanced counterfeit detection capabilities, and details count reporting functions, Zeus packs amazingly strong features into a compact body.

ProNote 1.5

The ProNote is a powerful, convenient & compact machine that counts up to 1200 notes per minute and has a reject compartment for counterfeit bills. The cutting-edge sensor technology and efficient design combine to create one of the most compact table-top systems in its class.

Currency Counters

Glory GFB 830

This machine will outperform—and outlast—any other counter in its class. The GFB 830 combines both dual magnetic and ultra-violet counterfeit detection – giving it the most precise counterfeit detection in the market. Its handsome, space-saving design is remarkably easy to use.

Teller & Passbook Printers

New England Money Handling Systems is proud to be a full service Epson Envision Partner. Epson is the leading manufacturer of POS printers in the world. All of their printers are available in either Dark Gray or Epson White with plug-n-play inter- face cards to meet the ever changing demands of your financial institution.

Epson TM-T88VI

TM-T88VI POS Receipt Direct Thermal Printer is designed with speed and reliability in mind. This printer makes busy workdays a breeze. mPOS friendly. Compatible with most iOS, Android and Windows mobile devices. ENERGY STAR certified – meets Federal guidelines for energy efficiency.

Epson TM-U675

TM-U675 multifunction printer brings a new dimension of quality, reliability and performance to the retail and banking environments. TM-U675 is packed with the features and functions you need most to ensure smooth, fast and productive printing of slips, receipts and validations—all in a single compact unit. Its excellent slips handling and other optimized features for retail make the TM-U675 the superior choice for busy counters.

Epson TM-H6000V

TM-H6000 Multifunction printer offers speed, multifunction support, and longevity you have come to expect from Epson. This printer is capable of receipt printer, check processing, and slip printing. Connectivity with Web-based applications and proximity mobile device printing. Eco-Friendly: RoHS compliant and Recyclable.

Star TSP650

Quiet Thermal Printer with Small Footprint

The TSP650 is a low cost and high-performance printer combined with the ability to work effectively in any environment. Out of the box, the TSP650 features swappable interface options including USB and Ethernet. With its “drop in and print” paper loading, small footprint and reliable guillotine cutter, the TSP650 is a welcomed addition to POS systems.

Now available with 2 USB ports

Craden DP9

Factory Remanufactured Compact Passbook Printers

The Craden DP9 is the perfect printer to fit onto teller counters crowded with hardware. It prints passbooks, receipts, validations, signature cards and cashier's checks. The Craden DP9 can be used in a shared printer environment or on the platform for document preparation and forms printing. It offers full width printing in a compact design.

Check Processing

Teller and Branch Capture Check Scanners

Canon CR-190i II

Canon has done it again. The new CR-190i II delivers high performance, reliability, and image quality to production check processing. With a convenient countertop design, built in jogger, and versatile document handling, the CR-190i II check transport can help meet even the toughest challenges.

Canon CR-120

Enhance traditional check processing with easy-to-operate, compact Canon imageFormula CR-120 check transport. With high-speed, high-quality, precise processing capabilities plus reliable item handling and other useful features, the CR-120 check transport can help promote adaptability and productivity for financial applications.

Epson TM-S9000 Multifunction Teller Device

Epson's fully integrated, multifunction TM-S9000 teller device offers multiple advanced features all in one small footprint. It features the industry's fastest check scanner speed, the highest MICR accuracy in its class, an award-winning TM-T88V receipt printer, cashier check and endorsement printing, 2-sided ID scanner, and more.

Check Encoders

Whether you are looking to replace an old encoder, move your check encoding in-house or begin encoding prior to imaging for retrieval by the check amount, we can help. Our sales staff is trained with a thorough understanding of the products available and we sell and service most brands including Maverick and Standard Register.

Remote Deposit Check Scanners

Canon CR-L1

The Canon imageFORMULA CR-L1 compact check transport is an easy-to-use solution for high-volume Remote Deposit Capture and remote lockbox check processing. With high-quality image scanning, precise MICR accuracy, and reliable item handling, the CR-L1 check transport can help distributed check processing.

Panini Vision X

The next generation of Panini Scanners available in single feed as well as 50, 75, and 100 checks per minute models. Panini is the industry leader in distributed capture scanners. As a Platinum Partner, New England Money will provide you with the best pricing and service options.

Digital Check

Digital Check manufactures a wide selection of check scanners for all applications, from the single feed CX-30 up to the 100 check per minute TS-240.

Smart Source

Quickly becoming one of the most utilized check scanners on the market. The SmartSource line is now available through New England Money Handling Systems.

Check Scanner Cleaning Cards

Custom-designed for Canon, Panini, Epson, and Digital Check

How Waffletechnology Works?

Waffletechnology™ is an advanced in cleaning card technology. The cleaning waffles are flexible and raised platforms. These platforms allow the card to clean previously unreachable areas within the check scanner. Now more dirt is removed making your check scanner cleaner and more reliable than ever before.

Check Joggers

The importance of check joggers in check processing centers has been known for many years. There is a perfect reason for that. Jogging a batch of checks for a few seconds in the check jogger perfectly aligns bottom and side edges of checks which reduces chances of check jamming and double-feeding. The Digital Check Smart Jogger was designed specifically for smaller banks, branches, community banks, and credit unions, with lower volume of checks.

Signature Pads

Offering the highest-quality and widest variety electronic signature capture tablets available.

With more than 15 different models to choose from, Topaz brings the right product to your application environment. Signature pad products include passive pressure touch pads, rugged signing surfaces with electro pens, interactive LCD displays include full-color VGA display, integrated fingerprint sensors, wireless capability, full-size inking clipboards, small-footprint and desktop units.

Secure Check Print and Automation System

Wycom Enterprise MICR Laser Check Printing System makes it simple and secure to sign and print checks from a single solution on your network. It's ideal for credit unions, or for accounts payable and payroll departments in companies of all types and sizes. It is powered for the highest-volume environments. Whether you use pre-printed stock or blank secure check stock, Enterprise turns your printers into secure check signers company-wide.

Time Stamps

Widmer T-4U

The Widmer Model T-4U Time stamp offers undisputable legible record that will facilitate time computation, reduce tardiness and provide required records for wage and hour regulations. It's versatility includes control of paperwork flow, job costing and validating documents.

Widmer T-3

The Widmer Model T-3 Time stamp is versatile, featuring high quality, clean, Crisp imprints. It is compact and offers a wide variety of desirable features.

Customer Testimonials

Dianne, you and your team have been instrumental in the development and implementation of a fully functional and efficient cash handling experience for our team at the new South Windsor location. Your knowledge about the products you sell provided valuable insight during our design process. Your personal attentiveness to our needs and requests, and your role as liaison with FENCO were above and beyond expectations. Your contributions to this process have been greatly appreciated! Please offer our thanks to the NEMH and FENCO teams for a job well done!

Maureen Sullivan, First Vice President/Corporate Secretary, Windsor Federal Savings

Windsor Federal

To us at Bank of New Hampshire, New England Money is more than just a vendor – they're a trusted partner. When we were looking for ways to improve branch automation, they worked with us to install Teller Cash Recyclers throughout our branch network. The level of service from the sales, installation, training and support teams was outstanding!

Cheri Caruso, VP, Senior Project Manager, Bank of New Hampshire

Working with Mike with the Rockland Trust Training lab ECR setup has been a great experience for the business. He has been extremely helpful through the whole process, and we have tested everything successfully. We appreciate the knowledge and dedication he brought to bring the project to the finish line.

I would like to pass along the same feedback about Maxx who has been a partner of mine in getting our sites up and running with Dynacore. He has been such a resource. Thank you for everything.

Where Each Relationship Matters®

Our friends at Rockland Trust
